Collecting the British Machins with David Alderfer

The course will focus on the various characteristics that collectors must consider in order to appreciate all the varieties. Characteristics include colors, face values, numerals, papers, gums, phosphor band variations, perforations, regional issues, methods of printing, booklets, se-tenant combinations, and postal history. A PowerPoint presentation illustrating key points and hands-on experience will be part of the workshop. There will be something of interest for beginner, intermediate, and advanced collectors alike.

David began collecting Machins in 1983, initially attracted to the many bright colors of individual stamps in the series. For the past 25 years, he has kept up with the many technological changes that have affected the issuance and production of the current definitive series of Great Britain and reports on them for Linn's Stamp News. He currently lives in the Chicago area with his wife, Kay, and is a retired pastor of the Lutheran church.
